N/A = Data not available or not comparable for that year. All percentages use total population as denominator unless otherwise noted.

1950 age base for labor force: 14+. 1960: 14+. 1970+: 16+. Poverty data begins 1970 (family poverty) / 1980 (individual poverty).

Hispanic/Latino category introduced as a distinct self-reported characteristic beginning with the 1980 Census.

**Because the U.S. Census Bureau changed their allocation rules for race in 2020 for White and Black respondents who included an ancestry, the 2019 data is the last comparable year for race data for the U.S. Census. It will remain this way until the U.S. Census Bureau releases a "crosswalk" for undoing this reallocation. There is nothing to suggest they will do so in the near future. The end result is a significant increase in the Two or More race category and while it does not show up in these aggregate tables, it shows up in detailed race tables. For example, the Non-Hispanic Two or More race category in 2019 was 0.5% and 1.4% for Hispanic Two or More race. In 2023, these numbers jumped to 1.3% and 32.0% respectively.
